

Dual Stick Cutter

- This Dual Stick Cutter brings safety, simplicity, and speed to your operation. The Dual Stick Cutter is designed for easy cleaning and optimal performance. Test have proven that the specially designed V-trough, together with the unique arrangement slicing knives, produces the highest possible yields.
- **SAFETY FIRST**
 - The Dual Stick Cutter uses top-of-the-line pneumatic components to provide the highest degree of safety. When the safety door is opened, the stroke will not return to the top - it stops instantly. When the door is closed, the process continues. A lockable air shutoff valve, as well as a filter, oiler & regulator are standard.
- **TOP QUALITY CONSTRUCTION**
 - Uses a high-flow, high-tech valve specially designed for harsh environments.
 - The product door is constructed using high-impact, scratch-resistant clear Lexan, so the operator can monitor the operation continuously.
 - Twin Rods comprise a non-rotating, double-acting pneumatic cylinder with variable cushioning at each end of the stroke. Extruded aluminum and internal tie rods allow for easy cleaning.
- **SPECIFICATIONS**
 - Height 23"
 - Width 12 -1/2"
 - Depth 20"
 - Knives Standard Shavers Mount
 - Weight 60 lbs.
 - Air Requirements 30 Cycles = 16 CFM @ 100psi
