

Dual Electric Stick Cutter

- *Top of the Line Components
- *Slicing, Wedging, & Sticks
- *Individual Blade Replacement
- *Compact Portable Package

The TS Designs Dual Electric Stick Cutter incorporates safety, simplicity, and speed to increase your production. The Dual Stick Cutter is designed for easy cleaning and optimal performance. With off the shelf components.

Safety First

*The Dual Stick Cutter uses top of the line components to offer the highest degree of safety. If the safety door is opened the sticker stops instantly. When the door is closed the process continues.

*The product gate is setup on a slip clutch system, which also has auto resetting. Should anything get wedged in the gate door area, the gate will stop, and after the item is removed the gate will reset itself and continue it's operation.

Top Quality Construction

*The Dual Stick Cutter uses off the shelf components including cutting heads and replacement blades which are special designed for harsh environments.

*High impact scratch resistant clear Lexan is used for the product door so the operator can monitor the operation at all times.
