

Fruit Wedger

- The Fruit Slicer incorporates safety, simplicity, and speed to increase your production. The Fruit Slicer is designed for easy cleaning and optimal performance. Quick-change push blocks and slicing blades promote efficient slicing and the highest possible yields.
- **SAFETY FIRST**
 - The Fruit Slicer uses top-of-the-line components in its fully pneumatic system to result in the highest degree of safety. When the safety door is opened, the stroke will not return to the top - it stops instantly. Only when the door is closed does the process continue. A lockable air shutoff valve, as well as a filter and oiler, are standard.

TOP QUALITY CONSTRUCTION

- Features a high-flow, high-tech valve specially designed for harsh environments.
 - Product Door is constructed using high-impact, scratch-resistant clear Lexan, so the operator can monitor the operation continuously.
 - Twin Rods comprise a non-rotating, double-acting pneumatic cylinder with variable cushioning at each end of the stroke. Extruded aluminum and internal tie rods allow for easy cleaning.
- **SPECIFICATIONS**
 - Height 33"
 - Width 10"
 - Depth 18"
 - Knives 5 Standard Styles Available
 - Weight 60 lbs.
 - Air Requirements 30 Cycles = 8 CFM @ 100psi
