

## 3 Level Processing / Trim Lines

### Custom Build to Fit **Your** Needs

*Rotary Pre-Wash at the Infeed Side of the System or a Final Wash or Rinse at the End of the System.*

Options Available for Each Station and/or Each Side:

• Cutting Boards	• Coring Tubes	• Waste Chutes	• Scales
• Coils	• Petal Valve	• W/or W/o Platforms	• Rinse Station

Top Take-Away Conveyor can be inclined at the discharge end for feeding cutters or wash system. The bottom waste conveyor can also be inclined at the discharge end to feed into a separate waste conveyor for a waste removal system or to feed waste into a tote.

### Dual Coring Cutting Boards

These cutting boards can be flipped in place with coring tubes on each side. Dual Purpose Coring Tubes can be setup to have one size of core tube on one side of cutting board and another size on the other side. For example lettuce core tube on one side and when flipped there is a cabbage coring tube on the opposite side.
